Judge
SINCE 1970

Empowering Businesses with Robust Computing Infrastructure

In today's digital landscape, computing infrastructure is the backbone of any organization's operations. It encompasses all the physical and virtual resources that support businesses' computing needs, from servers and storage to networking and cloud services.

SERVICES OFFERED AND TECHNOLOGIES UTILIZED

- **SaaS Implementation:** Salesforce, Office365, SAP S/4Hana, Oracle ERP, Workday
- **Cloud Optimization:** AWS Cost Explorer, Azure Cost Management, GCP Cost Management, Kubernetes / Containers, AWS Auto Scaling
- **Cloud Governance:** Policy as Code (PaC), Infrastructure as Code (IaC), Compliance as Code (CaC), Azure Monitor, AWS CloudTrail, GCP Audit Log
- **DevOps & Automation:** Terraform, AWS CloudFormation
- **Cloud Migration:** AWS Service Migration, Azure Site Recovery, Google Cloud Database Migration Services, Database Replication, x86 to Arm
- **Cloud Security:** Azure Disk Encryption, AWS Key Management Service, GCP Cloud Key Management, DevSecOps
- **Cloud Strategy & Planning:** AWS Application Discovery, Azure Migrate, GCP Migrate for Compute Engine Benefits of Embedded DevSecOps

With a proven track record in cloud solutions and a commitment to excellence, Judge is your partner in achieving seamless cloud transformation.

15+ years
More than 15 years of experience in cloud computing

30%
Approximately 30% of all client projects focus on cloud solutions

AWS Select Certified Partner
We excel in consulting and training across all cloud platforms

SECURE EMBEDDED DEVELOPMENT WITH DEVSECOPS

The Judge Group offers embedded DevSecOps solutions that integrate security practices into every stage of the embedded systems development lifecycle. By embedding security checks and compliance requirements early, vulnerabilities are minimized, and secure deployments are accelerated. With a focus on the IoT and automotive sectors, we leverage advanced tools to ensure both security and functional integrity from design to deployment:

- Automated Testing: Utilize advanced tools for automated testing.
- Static Code Analysis: Implement static code analysis to identify potential issues early.
- Real-Time Monitoring: Ensure continuous monitoring for real-time insights and security.

Our services also include setting up CI/CD pipelines with security protocols and Infrastructure as Code (IaC), enabling seamless updates and rapid scalability while maintaining compliance with industry standards. This proactive approach to DevSecOps not only safeguards embedded applications but also optimizes time-to-market, making Judge a reliable partner in secure embedded development.

WHY CHOOSE THE JUDGE GROUP?

Our team deploys around 10,000 practitioners annually, roughly 1,500 of which specialize in cloud computing across various industries such as financial services, healthcare, telecom, retail, and government.

- **Extensive Expertise:** Our team has deep knowledge and experience across various industries which allows us to provide tailored solutions that meet the specific needs of each sector.
- **Customer Centricity:** We prioritize our clients' needs and work closely with them to deliver solutions that drive their success. Our customer-focused approach ensures that we understand and address the unique challenges and goals of each client.
- **Strong Security and Compliance:** We adhere to the highest standards of security and compliance, ensuring that our solutions meet industry regulations and protect our clients' data. Our rigorous approach helps mitigate risks and maintain trust.
- **Comprehensive CI/CD:** We offer end-to-end Continuous Integration and Continuous Deployment (CI/CD) services, enabling seamless and efficient software development and deployment. Our CI/CD solutions help streamline processes and improve productivity.
- **Reliability:** Our proven track record of success demonstrates our ability to deliver high-quality solutions consistently. We are committed to reliability and excellence in every project we undertake.
